VELIKOST OMARICE/CABINET SIZE

Osnovni pogoj je prostor, ki ga imate v kuhinji, velikost omarice pod pomivalnikom ter pozicija priključkov (voda in odtok). Naše pomivalnike se lahko vgradi v omarice od minimalne širine 300 pa vse do 900 mm. Manjše pomivalnike lahko vgradite tudi v omarice večjih dimenzij.

This is basic information before you start choosing kitchen sinks. Size between two sides of wooden cabinet. Place where is water and drain connection. Our sinks can be installed from 300 till 900 mm. Smaller sinks can be install in bigger cabinet size – opposite is not possible.

IZVEDBA POMIVALNIKA/TYPE OF SINK

Izvedba pomivalnika je lahko desna, leva ali reverzibilna. **Pravilo:** stojite pred pomivalnikom, če je posoda na levi strani in odcejalnik na desni – ta pomivalnik je LEVI (LEVI – DESNI; definira se po poziciji večje posode). Premislite na kateri strani oziroma s katero roko običajno odpirate pipo in na kateri strani bo štedilnik, kje boste imeli prostor na pultu za pripravo hrane in si tako pomagajte za ergonomsko ureditev kuhinje.

Sinks can be left, right and reversible. Rule: stand in front of the sink – if bigger bowl is on your left hand - sinks is left. Reversible you can use as left or right.

NAČINI VGRADNJE/INSTALLATION TYPES

ploskovno vsadna (S): v izrez ustrezne velikosti z zgornje strani vstavimo pomivalnik in ga pritrdimo s pritrdilci. Na pultu ostane tanek rob pomivalnika.

Flat mount sinks are installed into all kind of material of kitchen worktops. Inset sinks with flat rim. Only thin rim of sink is on the worktop. Thin rim allow easy cleaning.

popolnoma vsadna (F): montažo mogoča le v vodoodporen pult, ki je obdelan tako, da je rob pomivalnika v isti ravnini kot pult.

Flush mount »rim-less« sinks are installed only into waterproof kitchen worktops. **Installed flush mount from below** and attached to the worktop on a single level without any protruding. Cleaning become very easy.

klasično vsadna (I): v izrez ustrezne velikosti z zgornje strani vstavimo pomivalnik in ga pritrdimo s pritrdilci.

Inset sinks are installed as classic into the kitchen worktop. Stainless and granite sinks are fixed by clamps.

nasadni pomivalniki (L): vgradnja kot zaključni element na obstoječe kuhinjske omarice. Pomivalniki imajo zidni rob. Pomivalnik ima vgrajen lesen okvir, ki vam omogoča montažo na omarico.

Lay on sinks are installed in the same level as work top or without work top. SINK SOLUTION lay on sinks usually have wall rim 30 mm and integrated wooden frame for easy installation.

vgradne posode (U): vgradnja s spodnje strani pulta.

Undermount sinks are installed from beneath your worktop, in a section that has been specially cut out for that purpose. Work top must be waterproof (stone, composite materials, glass).

ŠTEVILO POSOD/NUMBER OF BOWLS

- 1 posoda – običajno se enojne pomivalnike vgradi v kombinaciji z pomivalnim strojem in v kuhinjah kjer so omejeni z velikostjo omaric za pomivalno korito.
- 1 bowl – sinks with one bowl are usually install with combination of wash dishes machine and in kitchens with limited cabinet sizes and space. Except sinks with one bigger bowl.
- 1+1/2 posoda – kombinacija ene velike in ene male posode omogoča uporabniku praktičnost pranja in odcejanja, uporabno tudi pri pranju sadja in zelenjave v kombinaciji z dodatno opremo pomivalnika.
- 1+1/2 bowls – one big and one smaller bowl increase usefulness washing, drainage. Washing fruits and vegetables with sinks accessories.
- 2 posodi – za kuhinje z veliko prostora in za kupce, ki imajo radi veliko površino za mokri del kuhinje.
- 2 bowls – for space full kitchens and for users which like or need big wet part space of kitchen.

VELIKOST IN RADIJ POSOD/SIZE AND RADIUS OF BOWLS

Posode z velikimi radiji so enostavnejše za krožno čiščenje in brisanje, toda posode z malimi radiji nam nudijo bistveno večji volumen in prostor za čiščenje izdelkov, ki jih v posodah z velikimi radiji ne moremo. Posode SINK SOLUTION imajo radije 15, 25 in 65 mm.

Bowl with bigger radius give us elegance in kitchen they are easy for cleaning in corners but smaller radius give you different design- style and advantage with bigger space and volume. SINK SOLUTION make bowls with radius 15, 25 and 65 mm.

Rostfrei – nerjavna pločevina

- SINK SOLUTION pomivalniki so izdelani iz najkakovostnejše nerjavne pločevina AISI 304. Površina je lahko satinirana ali polirana.
- Površina je gladka brez por. Nerjavna pločevina nima vpliva na videz in okus živil.
- Enostavno čiščenje.
- Odpornost na visoke temperature do 290 °C.
- Večja odpornost na udarce (ne počí) - tudi posoda se ne razbije, saj material ublaži udarce.
- Možnost posebnega PVD nanosa v 3 različnih barvah (zlata, baker, antracit). S tem nanosom povečamo odpornost na praske in obstojnost samega materiala.

Inox- stainless steel

- SINK SOLUTION sinks are produced from best stainless sheet metal AISI 304. Surface can be satin or polish.
- The surface is smooth without pores. The appearance and taste of foodstuff are not affected by stainless sheet metal.
- Simple cleaning.
- Resistance on high temperatures to 290 °C.
- Greater resistance on blows (it does not crack) – also the bowl is resistant as the material eases blows.
- Option of special PVD deposit in 3 different colours (gold, copper, anthracite). The resistance to scratches and permanence of the very material is greated with this deposit.

GRANIT/GRANITE-COMPOSITE

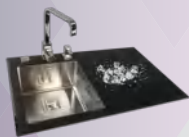

- 80 % najtrših granitnih delcev – quartz, 20 % barvila in lepila.
 - Gladka površina, brez por, material je skozi celo debelino enak.
 - Enostavno čiščenje; sledi uporabe in madeže enostavno obrišete z gobico in vodo.
 - Živila – lahko se pripravljajo neposredno na površini pomivalnika.
 - 4 barve (črna, bela, siva, bež).
 - Obstojnost barv tudi pri neposrednem sijaju sonca.
 - Občutek naravnih materialov - kamnin – pri delu je čutiti prijetne lastnosti kamna.
-
- 80 % of the hardest granitic particles – quartz, 20 % acrylic adhesive, pigments and glue.
 - Smooth area without pores – material is the same through entire thickness.
 - Simple cleaning; the traces of use and stains can be simply wiped with water.
 - Foodstuff – it can be prepared directly on the surface of the sink.
 - 4 colours (black, white, grey, beige).
 - Direct sun shining does not affect the permanence of pigments.
 - Natural materials impression – pleasant characteristics of stone are felt at work.

KALJENO STEKLO/TEMPERED GLASS

- Naraven material.
 - Enostavno za vzdrževanje in nego.
 - Odporno na temperaturo, praske in udarce.
 - Oblike pomivalnika in barve se lahko prilagajajo kuhinji. Možna izdelava tiska na steklo po želji - ideji kupca v kombinaciji z zidno stekleno oblogo. Tudi zelo visoke pipe bodo stale trdno.
 - Odporen na udarce.
-
- Natural material.
 - Simple to maintain and nurture.
 - Resistant to temperature, scratches and blows.
 - Shapes and colours of the sink can be adapted to selected kitchen. The making of glass print is possible at will – the idea of the buyer in combination with glass wall coating. Also, very high faucets will stand solidly.
 - Resistant to blows.
